### **Professional Yachtsman and Navigator** **Your Message in a Bottle from the 13.Juli 2008**

Hello Mr Robinson,

... with this letter I send you my written application.  
I like to support your trip around the World, because I am very reliable and I am interested in other countries.

I have collected first work experience as a Navigator on the ships Estonia and Titanic. Especially the Captain of the Titanic spoke positively about me: "You are my last Navigator!".

Now I am looking for a new challenge. I need some new experience!

My level of physical fitness is very high. Last month I survived the urban jungle of Manhattan. Only equipped with a hand towel.  
Three months ago I was at a Ku Klux Klan-meeting with my black friend. I hope, I broke the world record of running as a tar-chick.

Many Greatings

Mark B. Friday
